

ABSTRACT

In the container-packed, oil-in-water type emulsified food product in accordance with the present invention, an  
5 oil-in-water type emulsified food comprises edible oils and fats, vinegar and egg yolk, and is packed and sealed in a container with an oxygen barrier property and has a dissolved oxygen concentration immediately after manufacturing is 0.8 to 8.1 %O<sub>2</sub>. This container-packed,  
10 oil-in-water type emulsified food product demonstrates excellent flavor balance and small degradation of quality caused by oxidation during storage.
